16th June 2017

JL / jl / MHE phase 5 / planning group

Dear Mr Dillon

SITE: Millbrook Park (Former Inglis Barracks), Mill Hill, London NW7 1PX

PROPOSAL: *Reserved matters application seeking approval of appearance, landscaping, layout and scale for Phase 5 of the Millbrook Park development pursuant to Outline planning permission reference H/04017/09 dated: 22/9/2011, involving the erection of 144 units in the form of 38 x 1 bedroom flats, 17 x 3 bedroom flats, x 17 x 3 bedroom houses and 16 x 4 bedroom houses, together with details to discharge the requirements of conditions 5, 8, 26, 27, 29, 32, 35, 48, 52, 58, 63, 69, 70, 80, 83 and 85.*

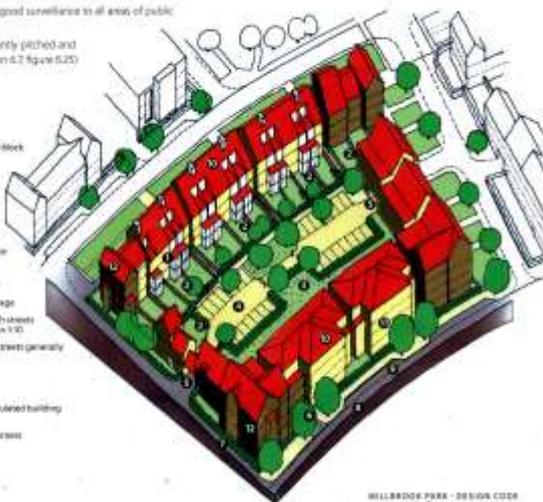

Reference: 17/3304/RMA

Thank you for your letter regarding this application. The Society has held a couple of meetings with GVA, Joseph Homes and their architects to discuss the design development. These meetings have been helpful and some of our initial reservations have been ironed out, but not all.

- Buildings mainly 3/4 storeys in height
- Houses in maximum terrace lengths of 8 units with secure passageways between to give residents access to rear gardens
- Dwellings to provide good surveillance in all areas of public realm around block
- Roof form predominantly pitched and composite (see section 5.7 figure 5.25)

Figure 6.8 Garden court type block
This form of block occurs within the central slopes character area

1. Terraced houses and apartment buildings
2. Private rear gardens
3. Communal amenity space
4. Courtyard parking
5. Access to rear courtyard
6. Access to communal garage
7. Gradients on north/south streets generally no steeper than 1:10
8. Gradients on east/west streets generally no steeper than 1:15
9. On street parking
10. varied roof forms
11. Steady to block and articulated building form
12. Special buildings form corners

MILLBROOK PARK - DESIGN CODE

Looking at the Design Code for the phase 5 site it falls within the area zoned Central Slopes East and on page 16 of our copy of the code, Figure 2.7 *Character Area Matrix*, the height above ground level for the phase indicates 2-4 storeys. The suggested Built Form is shown in Part 6, clause 6.3.2. Block Type 2 – Garden Court. This shows a court with housing and flats up to 4 storeys with all pitched roofs. What is being proposed in this application is far removed from the suggested image.

We include a copy of the garden court image for the avoidance of doubt.

However, in particular we noted that the houses which make up the western half of the proposed development under the above application do not relate well to the adjoining buildings to the north in phase 3, and to the old Officers Mess to the west.

Typical Housing in Phase 3

Officers Mess

London Forum

The blocks are of modern design with Georgian and Regency influence, with flat roofs and in pale brick. The properties in Charles Sevrigh Way, Guardhouse Way and Henry Harlot drive which immediately connect to this are of Victorian and Edwardian design, with roofing eaves and constructed in more of a red brick.

We have three other important points for your consideration:

1. On the 'Elevation 1 – East' the rhythm of the elevation breaks down at the Left Hand edge of the building and this corner is high, dominates and looks very solid whereas there is a lightness to the rest of this elevation. Similarly, the detail on the Southern Elevation of this block does nothing to reduce the bulk and mass of the block where it is 6 storeys high. The Design Code does not call for blocks of this height at this location and the building should be reduced in size.

2. The landscaping proposals within the site seem good. However, we feel there is limited street planting provided on the south side of the site, although there is some. This is not the case to the north and east sides where no street planting is shown. We believe this situation should be rectified as part of the planning application. This is highlighted on the illustration in the Design & Access Statement page 43. (see image adjacent)

3. Apart from the form of the buildings mentioned above, we are also concerned about the materials. The colour of the brick finally chosen will be very important. We are worried about the pale yellow brick and suggest this is reconsidered in favour of a warm red. Similarly, the colour of what appears to be metal roofing panels is a very important element. We feel these panels should relate to other buildings on the site – where a dark grey has been used not brown. We refer to the illustration in the Design & Access Statement page 43 in item 2, shown above, and this clearly shows the design issues we are concerned about.

We trust the points we have made will be taken into account when this application is considered. We have significant reservations about this scheme being approved as it stands. Please let me know if the Society can be of further assistance in this matter and do not hesitate to be in touch. Many thanks for the opportunity to comment.

Yours sincerely

John Living

Chair: MHPS
